

CMERS

Pillars & Values

Innovate

Drive forward new models in teaching and learning in medicine to meet the evolving needs of educators, learners, and the communities they serve.

Creative Transformation

We embrace creativity and the thoughtful application of new ideas, theories, and technologies to reimagine and improve how medicine is taught and learned.

Collaborate

Connect across disciplines to build stronger educational scholarship and broaden the impact of our research.

Collective Impact

We foster interdisciplinary partnerships across disciplines, departments, institutions, and professions to enhance the scope and relevance of our scholarship, advancing health professions education.

Mentor

Develop faculty through fellowships, learning communities, and individual consultation, empowering the next generation of education scholars.

Growth and Support

We support professional development by nurturing faculty and trainee potential, creating opportunities for guided growth, and fostering a culture of shared learning and mutual support.

Disseminate

Publish and present educational research to elevate Pitt Med's national voice and contribute to the health professions education evidence base.

Scholarly Rigor and Impact

We uphold the highest standards of methodological excellence and academic integrity, ensuring that our research translates into meaningful improvements in educational policy.
